2- Day Skill Development Colloquium: Climate-Proof: Embedding Disaster Adaptation & Resilience in Urban & Rural Planning

13 & 14 OCT, 2026,

Room No. 102 & Conference Room,
Department of Architecture & Planning, DAP, IIT Roorkee

Prof. Joe Ravetz

Leads the Future Cities & Governance in Manchester Urban Institute.

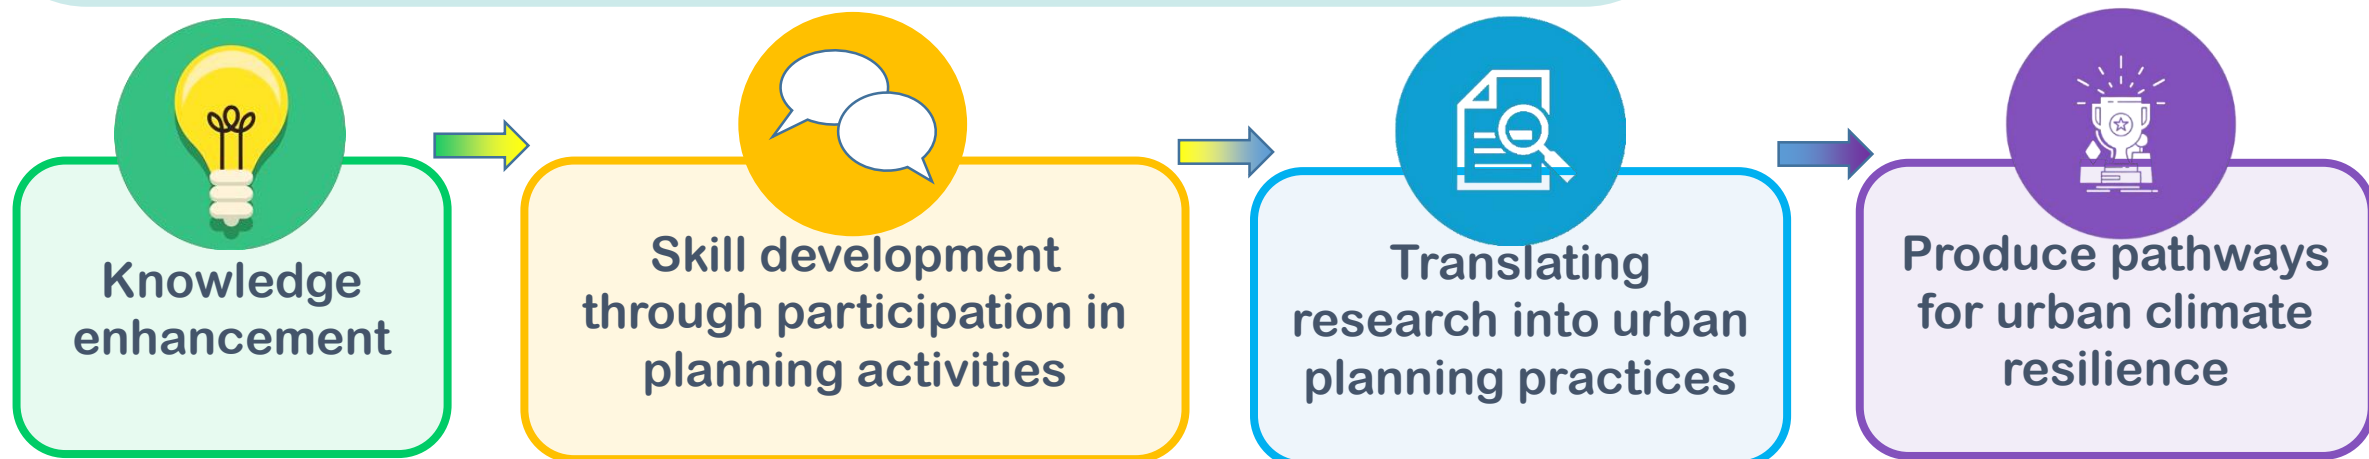

Joe Ravetz leads the 'Mind-lab' / Laboratory for Collective Intelligence for research on the co-evolution of cities, economies and societies, based on the landmark text Deeper City: collective intelligence and the pathways from smart to wise'.

Considered one of the leading personal of research delineation

About the Workshop

Climate-Proof looks ahead with a Foresight approach, beyond immediate events to underlying causes and transformations in progress. We look for the interconnections of natural, economic, social and political systems, for both risks and opportunities, and then use such insights to design Climate-Proof pathways for medium / longer-term climate resilience.
